ANDIS

BENEFITS OF USING A WIDE BLADE

Groom Faster & More Efficiently

Andis ceramicEDGE Wide Blades are 36% wider than standard blades and feature a 31-tooth ceramicEDGE cutter blade for a smooth finish. Plus, ceramic cutters run cooler and stay sharper longer. Perfect for grooming larger dogs and livestock, these blades are compatible with all professional Andis detachable blade clippers.

Ultimate Duo

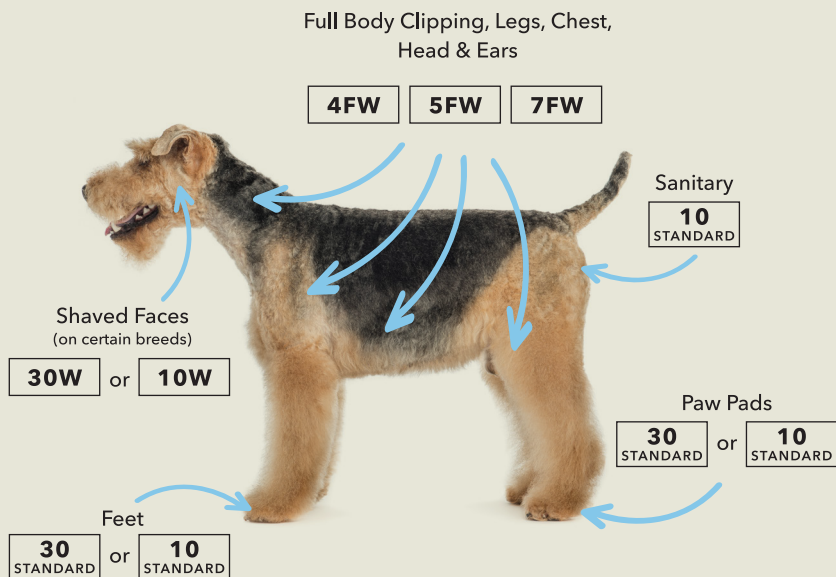

Pair a #10W or #30W blade with an **attachment comb** for ultimate cut length versatility. Achieve clean finishes with ultra-durable, stainless-steel combs that move through the coat more smoothly than plastic attachment combs.

COMB SIZES

#5	#4	#2	#1	#0	#A	#C	#E
1/8"	1/4"	3/8"	1/2"	5/8"	3/4"	7/8"	1"
3mm	6mm	10mm	13mm	16mm	19mm	22mm	25mm

Control

Wide blades can be more challenging to maneuver in tight or sensitive areas. Use a combination of wide and standard blades for different parts of the dog's body to ensure precision and safety.

Versatility

When used with a wide attachment comb, the blade is even more versatile allowing you to achieve longer trims and the style your client prefers. Only use the 10W or 30W wide blade under the attachment combs.

Efficiency

Wide blades cover a larger surface area, allowing you to groom larger dogs or dense-coated breeds more quickly and efficiently.

Comfort

Wider blades can make the grooming process faster, reducing the amount of time the dog needs to stay still, which can be more comfortable and less stressful for the dog.

User-friendly

With a wide blade, you can often achieve the desired length in fewer passes, which reduces the wear on both the blade and clipper as well as your hands, wrists, elbows and shoulders.

Consistency

They help achieve a more uniform cut, reducing the chances of uneven patches, especially on large dogs with thick or long coats.

PRO TIP

Pairing the 30W blade with a wide blade attachment comb will give you a slightly smoother finish.
