## MAGNETIC MOTORS

### Reliable Power & High Blade Speed for Light Body Grooming

Magnetic motors run at high speed resulting in smooth cuts. Light textures of hair will feed and cut well with magnetic motor clippers. Less moving parts make these simple, reliable and the longest lasting of all the motors.

## PIVOT MOTORS

### High Power & Lower Blade Speed for Complete Body Grooming

Pivot motors have a lower blade speed than magnetic motors but are twice as powerful. Higher cutting power makes them ideal for cutting thick or heavy hair. They are whisper quiet, cool running and long lasting.

## ROTARY MOTORS

### High Power & High Blade Speed for a Wide Range of Grooming

Rotary motors have an equal amount of power and blade speed. They are also the only motor available with multiple speeds. Their balance between power, speed, size and weight makes them extremely versatile and perfect for heavy-duty cutting.

# ultraEDGE BLADES

For a dependable, long-life blade, look no further than Andis UltraEdge blades. Our exclusive hardening process keeps blades sharper for a longer time. Add a special chrome finish that inhibits corrosion and you have cutting solutions that will last for years.
