MAGNETIC MOTORS

Reliable Power & High Blade Speed

Magnetic motors run at high speed resulting in smooth cuts. Light textures of hair will feed and cut well with magnetic motor clippers. Less moving parts make these simple, reliable and the longest lasting of all the motors.

PIVOT MOTORS

High Power & Lower Blade Speed

Pivot motors have a lower blade speed than magnetic motors but are twice as powerful. Higher cutting power makes them ideal for cutting thick or heavy hair. They are whisper quiet, cool running and long lasting.

ROTARY MOTORS

High Power & High Blade Speed

Rotary motors have an equal amount of power and blade speed. They are also the only motor available with multiple speeds. Their balance between power, speed, size and weight makes them extremely versatile and perfect for heavy-duty cutting.

ULTRAEDGE BLADES

12

For a dependable, long-life blade, look no further than Andis UltraEdge blades. Made from high-carbon steel to keep them sharper longer, with a chrome finish that inhibits corrosion, you have cutting solutions that will last for years.
